

COLLYMORE CONSULTING

Cybersecurity Risk & Privacy Excellence

November 4, 2025

Mr. Nigel W. Jones

Advisor

Fort Greene Partners

Dear Mr. Jones,

Thank you for the opportunity to support Fort Greene Partners' cybersecurity due diligence efforts. We appreciate your commitment to thorough risk assessment as part of your investment strategy focused on American Emerging Markets.

Attached is Collymore Consulting's proposal outlining our approach, scope, and contingent pricing structure for the cyber risk and privacy examination. Our assessment is specifically designed to align with insurance-driven cybersecurity evaluation standards, focusing on risk exposure, control adequacy, and data protection posture for your portfolio companies and potential acquisitions.

The engagement is intentionally structured to leverage your existing data room materials while identifying any gaps requiring further verification. This approach ensures efficiency while maintaining the thoroughness required for your investment decisions. All costs are contingent upon findings, providing you with financial flexibility throughout the assessment process.

Please note that this engagement is not a legal or regulatory certification — it is a targeted, expert-level cybersecurity evaluation designed to inform acquisition

decisions and insurer risk assessments. Our findings will provide actionable insights aligned with your investment criteria and risk tolerance.

Please find the proposal attached for your review. I am available to discuss scope adjustments, timeline preferences, or any specific areas of concern at your convenience. Given Fort Greene Partners' focus on innovation and diverse investments, we can tailor our assessment to address sector-specific cybersecurity considerations as needed.

Best regards,

Cylton Collymore

Chief Executive Officer

Collymore Consulting
